

PROJECT SUMMARY

Reconstruction of the cycling path between Clark Graham avenue and the EXO train station

Firm responsible : Parallèle 54 Expert Conseil

Method of financing : Surplus non affecté

Awarding of contract for works : à confirmer

Brief description :

The cycle path between Clark-Graham Avenue and the EXO train station is part of the Island of Montreal network identified in the 2019 Bicycle Plan approved by the Agglomeration Council. This section is used by pedestrians, cyclists but also by emergency vehicles, railway maintenance vehicles and those of the City's public works.

The road is in very poor condition and the lighting network in the area is deficient. In order to better serve users and in anticipation of the opening of the REM station in Sainte-Anne-de-Bellevue, the reconstruction of the cycle path and its lighting network is required.

Work planned (2024)

- Complete reconstruction of the roadway and the drainage network ;
- Reconstruction of the lighting network ;

Location of works :
